

You have made a significant investment in your technology solution. Ensuring that you can maximize that investment with interfaces to existing technology and new niche market solutions is a top concern.

Aloha Connect provides a structured framework for you to extend the capabilities of your Aloha solution, add breadth to your technology and meet your business needs today and in the future. Leveraging language-neutral development tools to extend Aloha's rich functionality to other applications, Aloha Connect Licensees can seamlessly integrate approved third party applications to their Aloha solution.

CLIENT SATISFACTION IS TOP PRIORITY

Providing a total technology solution and a means to meet critical niche business needs is the core focus of Aloha Connect. The structured approach to integration provides clients with the confidence of working with an authorized member of the Aloha Connect Community.

FLEXIBILITY OF OPTIONS TO EXTEND ALOHA SOFTWARE CAPABILITIES

As a Radiant client with the Aloha solution, you have options to consider when introducing complimentary technology:

- Leverage relationships with industry leading preferred partners that are members of the Aloha Connect Development Community
- Introduce a new business partner to the Aloha Connect program to work with you and Radiant to develop functionality meeting your requirements
- Create your own strategy for integration, using Aloha Connect development tools to create custom software interfaces in-house

ENSURE TIGHT INTEGRATION

The Aloha Connect open framework facilitates run-time bi-directional data communication and control between Aloha solutions and other external systems; helping to promote efficient data flow and provide operational enhancements to your business.

MAXIMIZE RETURN ON TECHNOLOGY INVESTMENT

By providing a proven means for solution integration, you are protecting your technology investment and ensuring that the value of existing and emerging technology is maximized.

SOLUTION COMPONENTS

THROUGH ALOHA CONNECT, RADIANT PROVIDES A MEANS FOR UNIFYING THE CRITICAL SYSTEMS IN YOUR BUSINESS WITH THE SUITE OF ALOHA SOLUTIONS. ALOHA CONNECT IS COMPRISED OF THESE KEY COMPONENTS:

ALOHA SOFTWARE DEVELOPER KIT (SDK)

The Aloha Connect SDK provides professional development organizations with a toolkit to successfully create an authorized interface between Aloha and other applications.

- Proven set of integration tools to support development of in-store and above-store applications that interact with Aloha systems
- Includes complete application interface documentation (API), code examples and testing tools

ALOHA CONNECT INTERFACE

Enhance your POS or Back Office capabilities and technology ownership experience.

- Offers a dynamic bi-directional communication framework for external applications to interface with the Aloha solution
- Supports high-value technologies; such as handheld devices, pay-at-table, web ordering, web reservations and other custom client applications

LICENSING

End users using interfaced applications must be appropriately licensed.

- As an end user, it is important to protect yourself by leveraging the Aloha Connect development community exclusively for your interface needs
- Specific requirements for licensing exist, please contact your Radiant Representative for additional details

KNOW WHO YOU ARE WORKING WITH

- Authorized Developers have completed a structured business case and feasibility study to join the Aloha Connect Community. Authorized Developers consist of client organizations developing their own software interfaces to Aloha and third parties working on their behalf. Third party Authorized Developers are licensed to work with specific clients for the development of specific interfaces and functionality.
- Partners have exceeded the requirements of an Authorized Developer and their solutions are considered suitable to extend across multiple clients and/or multiple functionality elements.
- Strategic Partners have achieved the highest level of partnership. Their solution is considered market ready for all clients and is promoted by Radiant Systems.
